

COVID-19 Building Check-In Routine

Check-in Station

The IoT Conduit is implementing an innovative and low contact check-in station at the entry way of 12-22 North coworking.

A check-in form and a contact-free temperature check will be required for all visitors upon entering the building. This is to ensure our tenants and employees are safe from anyone carrying COVID-19 symptoms or those that haven't been practicing social distancing.

The check-in station in the lobby will contain disinfecting and cleaning supplies, as well as hand sanitizer. Guests and tenants are encouraged to use these frequently, especially when using common spaces, to slow the spread of COVID-19.
